

BLONDOR FREELIGHTS

MIXING RECOMMENDATIONS

Depending on the desired degree of lightening and consistency, mix the FREELIGHTS White Lightening Powder (A) with FREELIGHTS Developer (B),

- · Vol. 20, 6% (for gentle lift)
- · Vol. 30, 9% (extra lift)
- · Vol. 40, 12% (maximum lift) in a non-metallic bowl.

MIXING RATIO 1:1 - 1:3 (recommended 1:1.5)

For on-scalp application, use a 6% (20 vol.) developer as a maximum. Do not use heat.

APPLICATION

Apply on dry hair. Start applying sweeping motion. Product should be applied only on the strand surface area. Do not saturate the strand in the mixture.

TIPS ON MASS APPLICATION - TENSION & RHYTHM

- Keep the hair strand under tension. Using FREELIGHTS Paddle will help.
- Start in the mid lengths and sweep lightly to the roots
- Maintain rhythmic flowing sweeping movements

DEVELOPMENT

Development time depends on the condition of the hair and the desired level of blonde. The maximum total development time is 50 minutes. Check hair every 5-10 minutes during process. If adverse reaction occurs during treatment (e.g.itching, burning, rash or any unexpected reaction), stop and immediately rinse with lukewarm water. If necessary, seek medical treatment.

AFTERTREATMENT

After development time is complete, rinse out thoroughly with warm water and shampoo. Apply BLONDE SEAL & CARE for increased shine and condition.

TIPS ON MASS APPLICATION - CREATIVITY

- Visualize where you want to place lights
- Look at the natural flow and the variances of color in your client's hair
- Place highlights where sunlight would naturally lighten the hair
- Cut before color application allowing you to follow the shape of the haircut

NOTES:
